organic cyclic compound biosynthetic process
regulation of metabolic process
single-organism process
biological regulation
response to endogenous stimulus
signal transduction by protein phosphorylation
single-organism metabolic process
regulation of transcription from RNA polymerase II promoter
cellular developmental process
secondary metabolic process
pectin catabolic process
multicellular organismal process
developmental process
lipid metabolic process
secondary metabolite biosynthetic process
catabolic process
response to ethylene
hormone metabolic process
response to stimulus
signaling
response to insect
defense response
organic cyclic compound metabolic process
reactive oxygen species metabolic process
single H3K27me3
regulation of methylation-dependent chromatin silencing
double H3K27me3/ H3K9me2
