

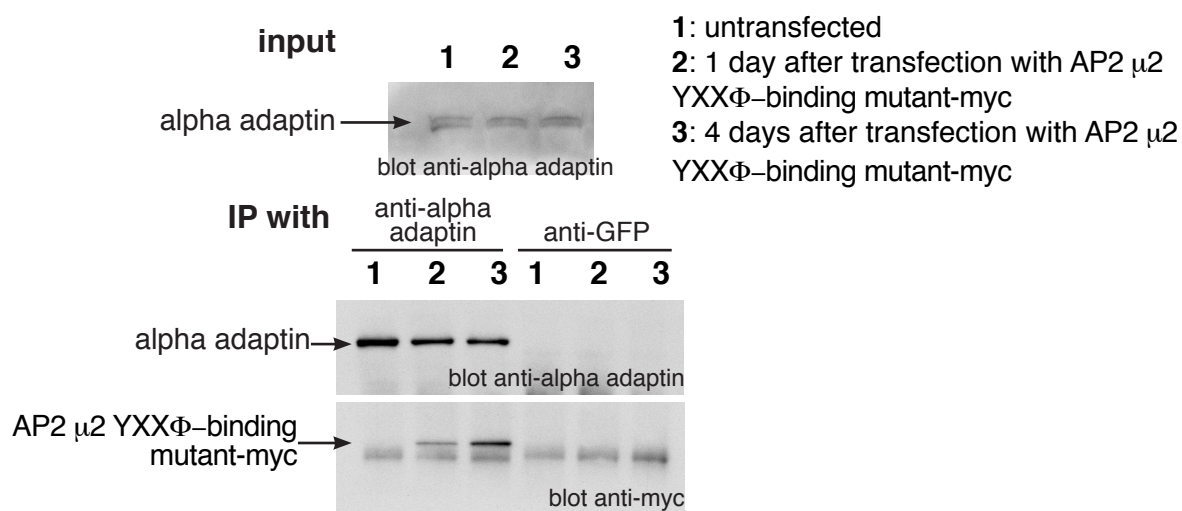

## Figure 8-figure supplement 2

**Figure 8-figure supplement 2. Incorporation of mutant  $\mu$ 2 subunits into AP2 complexes.** Cells were transfected with plasmids expressing the  $\mu$ 2 YXX $\Phi$ -binding mutant-myc as shown. Cell lysates were subjected to immunoprecipitation with anti-alpha adaptin, or as a negative control anti-GFP antibodies. Immunoprecipitates were analysed by Western blotting with anti-alpha adaptin and anti-myc antibodies.
