

Figure 3-Figure Supplement 1

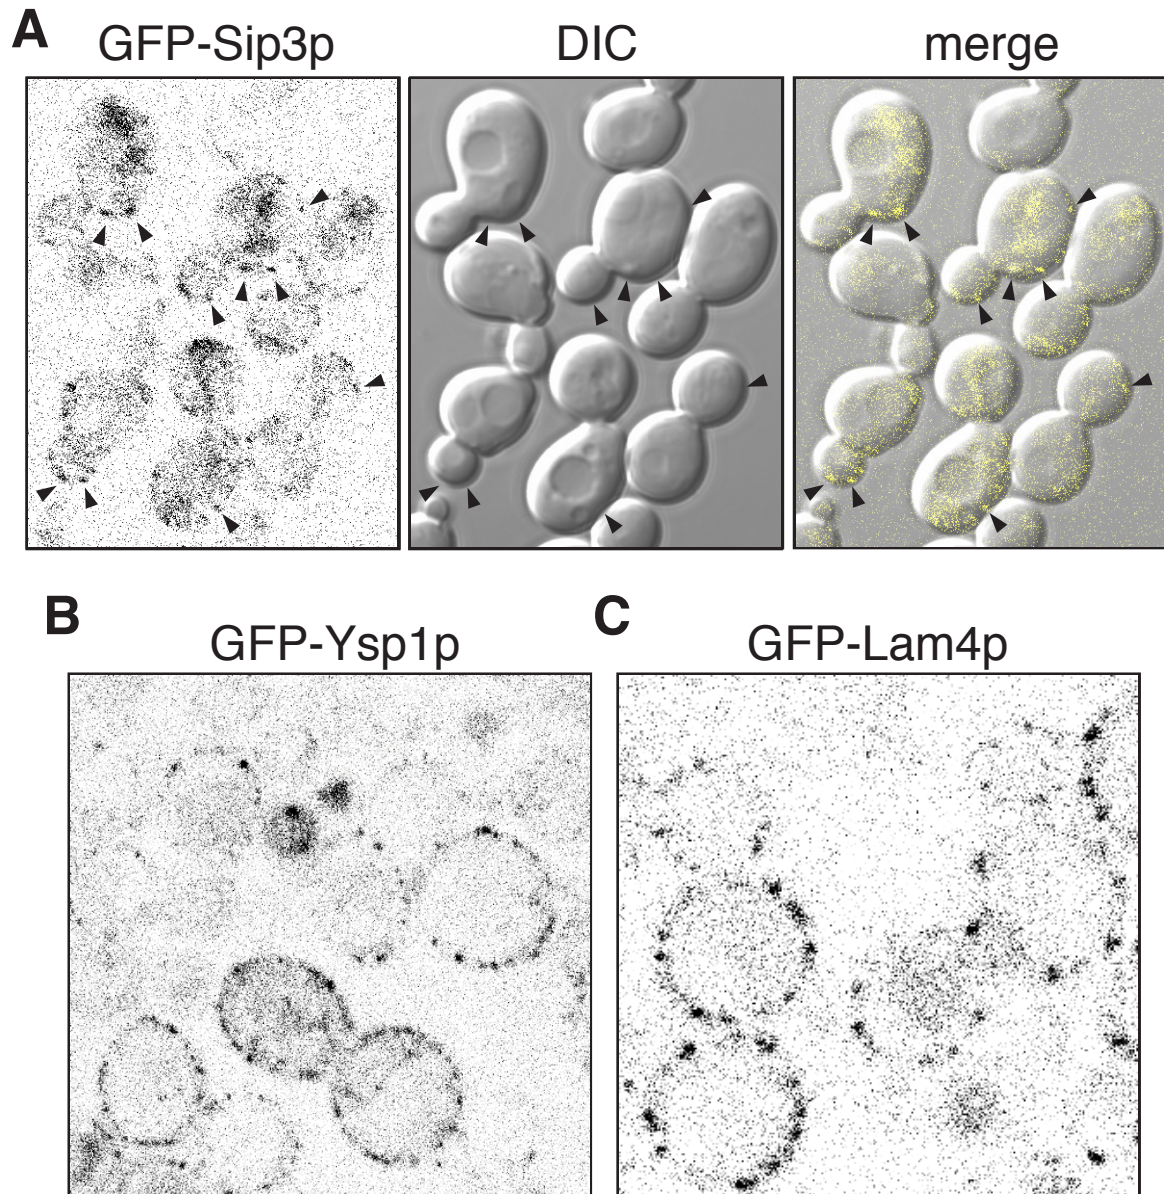

Figure 3-Figure Supplement 1: Sip3p Ysp1p and Lam4p expressed from their own promoters

A. B. and C.: Cells expressing plasmid borne N-terminally GFP-Sip3p, GFP-Ysp1p and GFP-Lam4p with their own promoters (inverted grey-scale). In A, Sip3p puncta are highlighted by arrowheads and also shown superimposed on DIC images of the same cells.
