

Figure 5-figure supplement 1

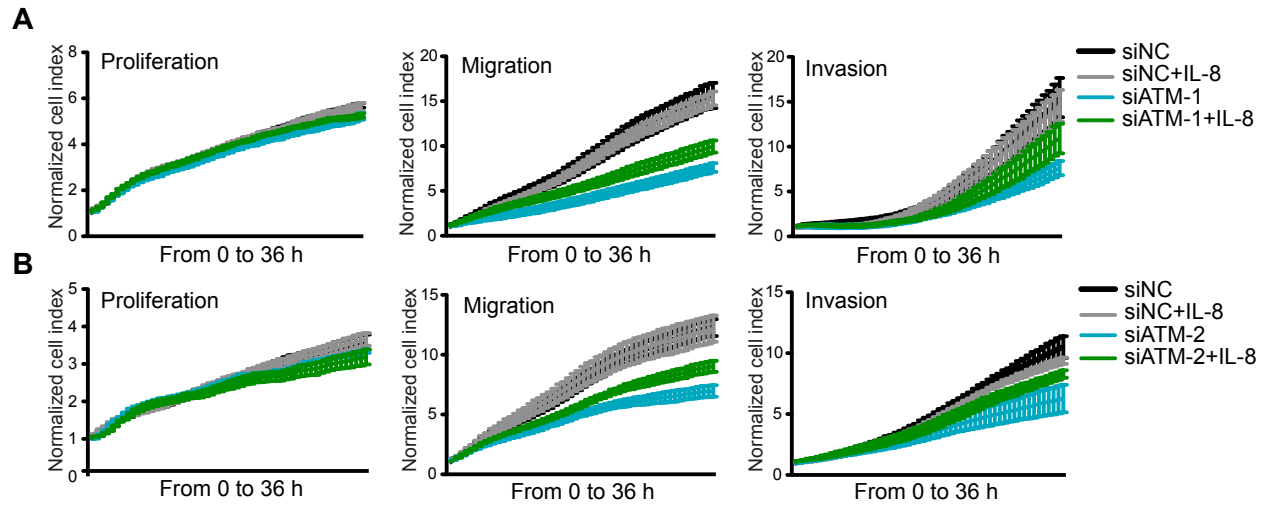

Figure 5—figure supplement 1. Exogenous addition of IL-8 rescues migration and invasion defects in ATM-depleted cells. **(A-B)** IL-8 addition restores impaired migration and invasion for cells treated with independent siATM-1 **(A)** and siATM-2 **(B)** compared to siNC control cells. Experiments performed as in Figures 5F and 5G (mean \pm s.e.m., $n=3$).
