

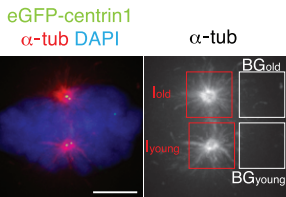

Figure 2 Figure Supplement 2
Gasic et al.,

Percent difference	$= \frac{(I_{old}-BG_{old})-(I_{young}-BG_{young})}{(I_{old}-BG_{old})+(I_{young}-BG_{young})} \times 100\%$
I_{old}	:summed signal intensity on old centrosome
I_{young}	: summed signal intensity on young centrosome
BG_{old}, BG_{young}	: background intensity near respective centrosome
