

Figure 3 – source data 1. Original immunoprecipitation and western blot images. Left: Plasma membrane proteins pulled down after cell surface biotinylation with streptavidin beads and immunoblotted for TRPV4 and GAPDH (loading control) for ND vs OC cells of MCF10A (10A), MCF10AT1 (AT1), and MCF10DCIS.com (DCIS.com). Right: The same procedure was performed to compare PM TRPV4 between ND vs OC MCF10CA1a cells.
