

Figure 7-figure supplement 2A, Secretion analysis of Hcp in the $\Delta 3eff$ mutant complemented with different TseP variants. RpoB serves as an equal loading and autolysis control. Hcp, RpoB, and 3V5-tagged TseP proteins were detected using specific antibodies.

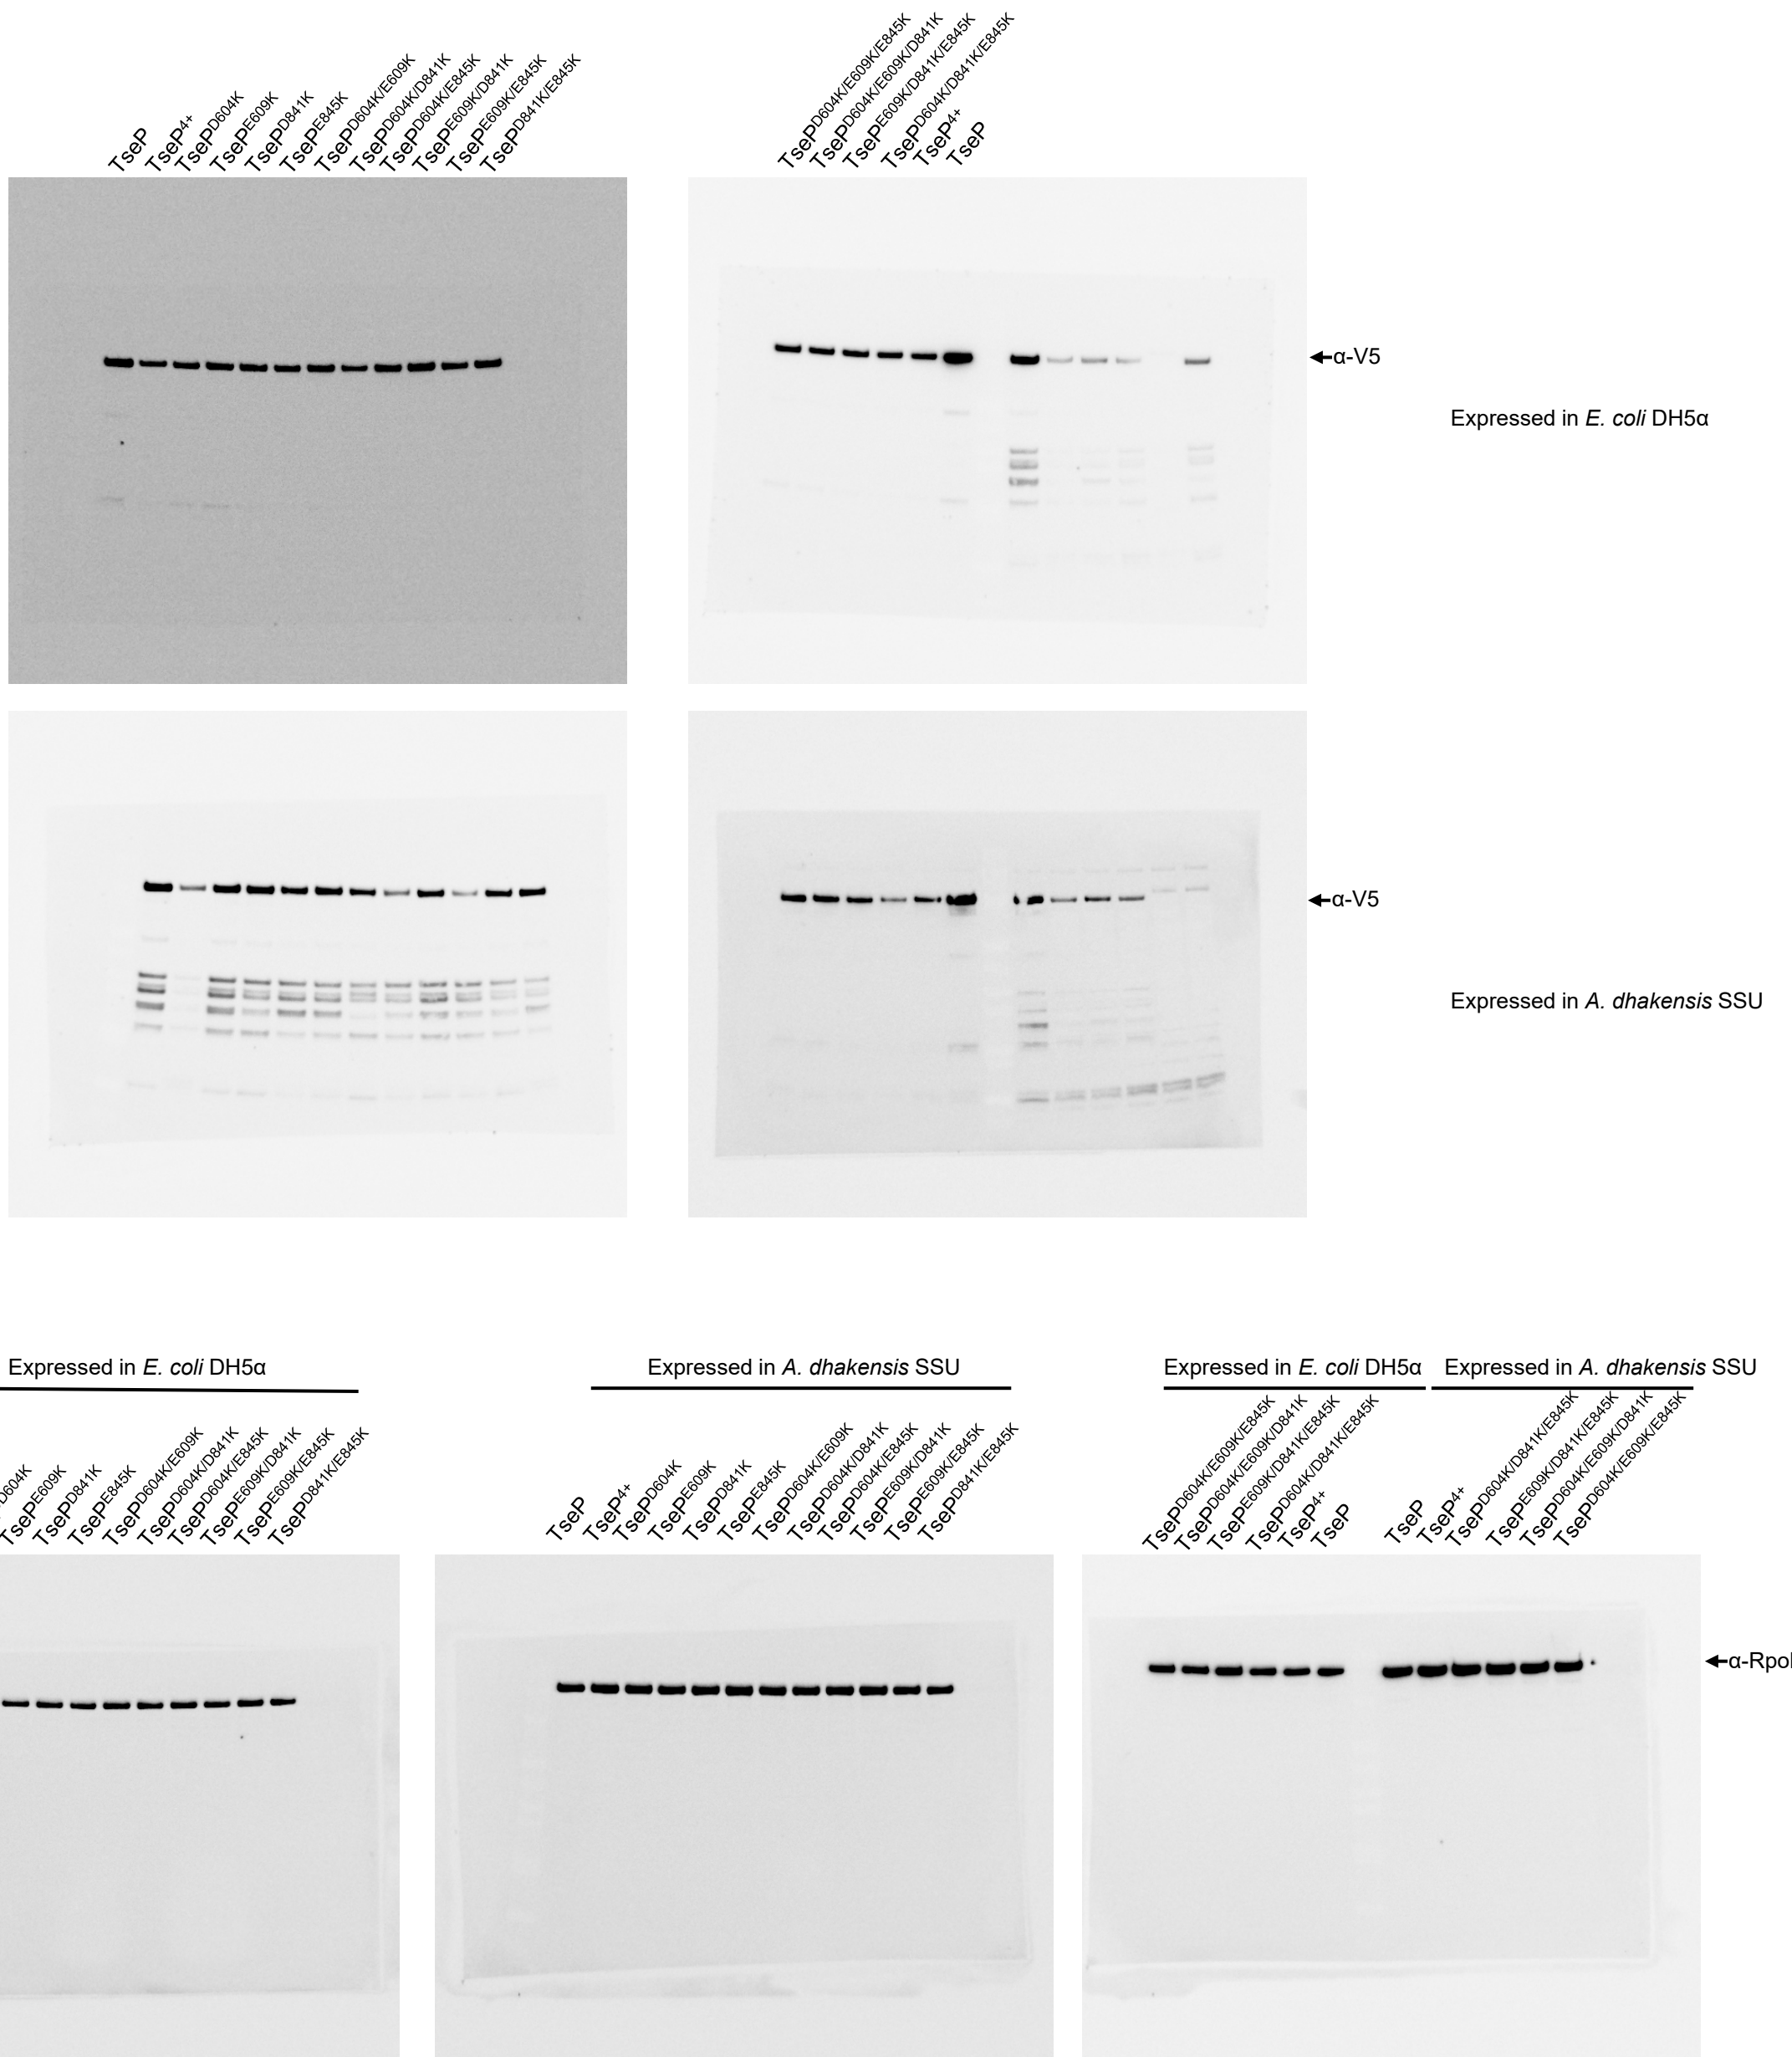

Figure 7-figure supplement 2B, Protein expression of TseP and its variants in *E. coli* and SSU strains. RpoB serves as an equal loading control. RpoB and 3V5-tagged TseP proteins were detected using specific antibodies.
