

Figure 3 – source data 5. Original images of C57BL/6Ntac (WT) and RAG2 KO mice infected with a mixed infection of 20:80  $\Delta$ MYR1-Luc:WT or  $\Delta$ MYR1 parasites.  $\Delta$ MYR1-Luc parasite growth was assessed via intravital imaging at day 3, 5 and 7 post infection. Highlighted the images used as representative in Figure 3, panel E.
