

OXPHOS cocktail

GAPDH

ATP5I

Figure 2, Figure supplement 1, Source Data 1. Original membranes corresponding to Figure 2, Figure supplement 1. Lane 1 corresponds to non-infected cells. Lanes 2–3 correspond to two clones of GFP control cells. Lanes 4–5 correspond to two clones of ATP5I guide #1 cells, and lanes 6–7 correspond to two clones of ATP5I guide #2 cells. Apparent molecular weight positions are indicated using the annotated blue prestained protein marker.
