

Figure 2, Source Data 2. Original gel images corresponding to Figure 2, panel A, and Figure 2—figure supplement 1, panels A and B. Precision Plus Protein Unstained Standards (Bio-Rad) were used as the molecular weight ladder for Figure 2, panel A. Gels were scanned using an Amersham Typhoon imager with the IR Short channel. For the gels shown in Figure 2, panel A, and Figure 2—figure supplement 1, panel B, samples were incubated at the indicated temperatures for 3 minutes.
