

Recombinant expression and purification of MmMYL3-GST

Recombinant expression and purification of GST

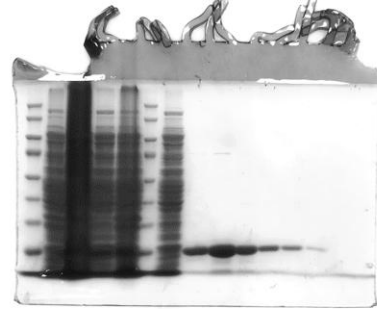

Figure 3-supplement 1, Source Data 1. Original gels corresponding to Figure 3 supplement 1B. Recombinant expression and purification of MmMYL3-GST (left) and GST (right). The sequence of the bands is as follows: marker; cell extracts before IPTG induction; cell extracts after IPTG induction; supernatant after centrifugation; precipitate after centrifugation; flow through; purified recombinant.
