

Raw unedited membranes

Figure 7E

Figure 7-Source Data 2. Original membranes corresponding to Figure 7E. Western blot was performed to detect cleaved caspase 3 (Cl-Casp3) and Casp3. KCs were treated without (blank, lane 1) or with either Isopropyl alcohol (Iso, lane 2) or 800uM palmitic acid (PA, lane 3) or 100ng rChi3I1 with 800 uM PA(lane 4) for 24 h.
