

Supplementary File 1: The reaction time of the corrected trials indicates that time is differently processed under internal and external perspectives¹

Fixed Effects ²	df	F	p
Sequential Distance	1, 6914	0.018	0.895
Duration	1, 6914	7.687	0.006
Same vs. Different	1, 6914	0.862	0.353
Future vs. Past	1, 6914	0.088	0.766
Syllable Length	1, 6914	33.222	< 0.001
Task Type	1, 6914	5.845	0.016
Task Type × Sequential Distance	1, 6914	13.959	< 0.001
Task Type × Duration	1, 6914	6.246	0.012
Task Type × (Same vs. Different)	1, 6914	70.490	< 0.001
Task Type × (Future vs. Past)	1, 6914	0.002	0.965
Task Type × Syllable Length	1, 6914	0.961	0.327

¹ Linear Mixed Model: $RT \sim 1 + \text{Task Type} * (\text{Sequential Distance} + \text{Duration} + \text{Same/Different} + \text{Future/Past} + \text{Syllable Length}) + (1 | \text{Participant})$

² The significant effects were highlighted. We did not highlight the significant main effects if the corresponding interaction effects were also significant.
