

## Figure 4 - Supplement 1 - Source Data 5

Uncropped nitrocellulose membrane showing total protein content detected using the VersaBlot™ Total Protein Normalization Kit CF-680T, including FIKK10.2-TuboID expressing parasite lysates alongside the wild-type parental strain (*Plasmodium falciparum* NF54 DiCre) lysate. The red boxed area indicates the region presented in the manuscript. For completeness, a higher-contrast image of the same blot is also provided below.
