

## Figure 5 – Supplement 1 – Source Data 5

Uncropped protein gel (pre-transfer to nitrocellulose membrane) showing total protein content detected using the VersaBlot™ Total Protein Normalization Kit CF-680T, including VAR2CSA-TurboID-3xHA expressing parasite lysates alongside the wild-type parental strain (*Plasmodium falciparum* NF54 DiCre) lysate. The red boxed area indicates the region presented in the manuscript.
