

Figure 3—figure supplement 2. NMR Spectra of DD: CARD complex. A) $[\text{}^1\text{H}\text{-}^{15}\text{N}]$ HSQC spectra of p75^{NTR} DD in water in the absence (black) and presence (red) of RIP2 CARD. B) Representative slices from the $^{13}\text{C}, ^{15}\text{N}$ -filtered 3D NOESY spectra. Asterisk denotes ambiguous NOE peak.
