

Figure 3 - source data 1

A

B

Figure 3 - source data 1. Ancient mtDNA recombination in CTVT clade 1. Maximum likelihood cladograms constructed using clade 1 mtDNA positions **(A)** 1-5429bp and **(B)** 5430-16176bp (see Methods). Trees were constructed with 153 clade 1 CTVT mtDNAs rooted with the CTVT1 haplotype, which contains clade 1 clade-defining germline and potential somatic substitutions (Methods, Figure 1-figure supplement 6). Bootstrap values were calculated from 100 bootstrap replicates and are shown where bootstrap values \geq 60.
