

**Figure 1- figure supplement 2.**

**Graphical summary of *TP53* non-synonymous mutations in melanoma in indicated studies.**

Distribution of different type somatic mutations mapped across *TP53* gene in melanoma (A) TCGA and (B) MSK-IMPACT. Circles are colored with respect to the corresponding mutation types as follows: Missense Mutations- green; Truncating Mutations (Nonsense, Nonstop, Frameshift deletion, Frameshift insertion, Splice site)-orange; Inframe Mutations (Inframe deletion, Inframe insertion).
