

A

Figure 4- figure supplement 3.

Knockdown efficiency upon infection with shRNA targeting p53.

A. mRNA expression was quantified by SYBR-green based RT-qPCR in the indicated cell lines 96h post infection. Each bar is the average of 3 replicates and represents mRNA expression of the indicated gene relative to GAPDH (p-value, * <0.05 , ** <0.005 and *** <0.0005 unpaired t-test).
