**Figure 4 -figure supplement 1. CLIK plots.**

This figure is related to the data displayed in Table 1. Plots were generated by the CLIK web tool (<http://www.rothsteinlab.com/tools/clik>; Dittmar et al., 2013) using lists of ORFs ranked on growth-corrected H3K79me score as input. The main clusters shown in the magnifications were analysed for enriched complexes, and the results of this analysis can be found in Table 1 and Table 1-source data 1.
