

A**B**

Fig. 3 figure supplement

A) The *tir1-1/afb2/afb3* mutant reacts to auxin (10 μ M NAA) and fusicoccin (1 μ M) similarly to Col-0. Errorbars represent stdev.s.

B) Non-induced *HS::axr3-1* hypocotyl segments also behave as a control – elongate in the presence of auxin (10 μ M NAA) and fusicoccin (1 μ M). Errorbars represent stdev.s.
