

**A**

**Figure 3—figure supplement 1.**

**TGF-beta signaling is upregulated in FACS sorted CD44+/CD24- cells.**

- A. Expression of well known TGF-beta target genes in CD44+/CD24- cells relative to CD44-/CD24+ cells sorted from H1650 and MCF7. mRNA expression was quantified by SYBR-green-based RT-qPCR. Each bar represents mean  $\pm$  SD of 3 replicates from 2 independent experiments and represents mRNA expression of the indicated gene normalized to GAPDH expression of each cell line (n=6). p-value  $<0.05$ ,  $<0.005$  unpaired t-test.
