

**A****B**

**Figure 3 -- figure supplement 2. Comparison of heart Ep300<sup>fb</sup> regions to a compendium of heart enhancers assembled by Dickel et al. (2016).** This compendium was based on H3K27ac ChIP-seq and Ep300 antibody ChIP-seq. Most compendium regions had low enhancer scores and are not expected to validate in transient transgenic assays. **A.** Venn diagram showing that 47% of Ep300<sup>fb</sup> heart regions overlap with heart compendium regions. **B.** Analysis of the fraction of compendium regions that overlap the Ep300<sup>fb</sup> heart regions, as a function of enhancer score.
