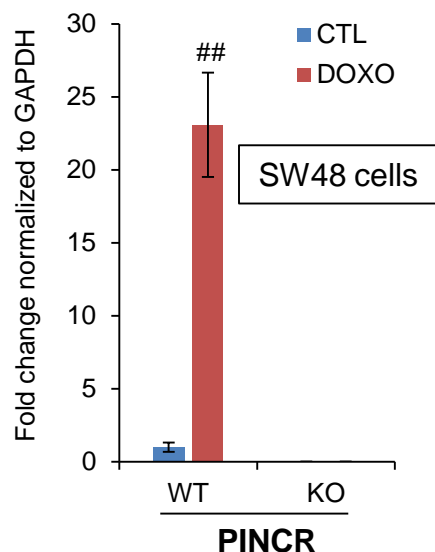

Figure 3 – figure supplement 2. (A) Partial genomic sequence of *PINCR* from Sanger sequencing and snapshot of *PINCR* locus (using BLAT) for the *PINCR*-KO SW48 clone is shown. The p53RE is underlined and in green font. (B) qRT-PCR analysis from *PINCR*-WT and *PINCR*-KO SW48 cells untreated or treated with 5-FU for 24 hr. Error bars represent SD from three experiments. $^{##}p < 0.001$.
