

Figure 9 source data 2. Protein accumulation of non-NLR proteins in *exal* mutants.

Immunoblot analysis of protein levels of FLS2 (A), BAK1 (B), EFR (C), MOS4 (D), MOS 12 (E), HSP70 (F) and Histone H3 (G) in four-week-old soil-grown Col-0, *exal-1* and *exal-2* plants. Equal loading is shown by Ponceau S staining of a non-specific band. At least two independent experiments were carried out with similar results. Star indicates non-specific band. The relative band intensity is shown below (normalized to loading control, relative to Col-0). Molecular mass markers in kilodaltons are indicated on the right.
