

**Fig. 2- figure supplement 6.Heterologous expression constructs of multipartite plastid-targeted proteins.** This figure shows the localisation of GFP overexpression constructs for copies of two proteins from the dinotom *Glenodinium foliaceum* (**Panel A**) , and three proteins from the eustigmatophyte *Nannochloropsis gaditana* (**Panel B**) that are of non-plastid origin, but show multipartite localisation to the plastid and one other organelle, per Fig. 2, figure supplement 5.
