

Figure 5- figure supplement 2. Localisation of the recombinase and *ssb* genes in different staphylococcal phage genomes.

The 5' regions of phages 80α (NC_009526), φ80 (DQ908929), φ52A (AY954965), φSLT (AB045978) and φN315 (NC_004740) are shown. Yellow: integrase (*int*); black: regulatory module; blue: *ssap* genes; red: *ssb* genes; grey: other genes.
