

Figure 5-figure supplement 1. Spectra validation for altSLC35A4^{5'}

Example of validation for altSLC35A4^{5'} specific peptide

RVEDEVNSGVGQDGSLLSSPFLK. (a) Experimental MS/MS spectra (PeptideShaker graphic interface output). (b) MS/MS spectra of the synthetic peptide.

Matching peaks are shown with blue masks. A diagram of the transcript with its accession number and the localization of the altORF and the CDS is shown at the top.
