

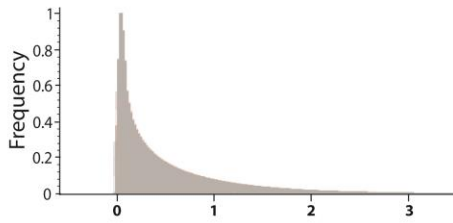

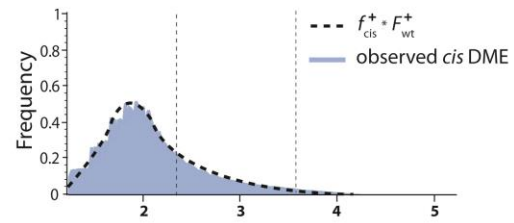

Figure 2 – Figure Supplement 9

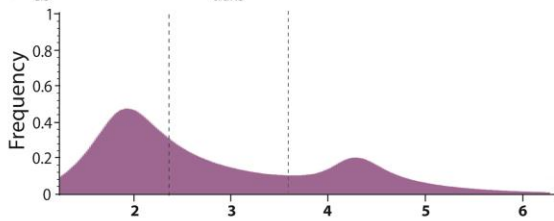

A) 'true' DME for *cis* (f_{cis}^+)

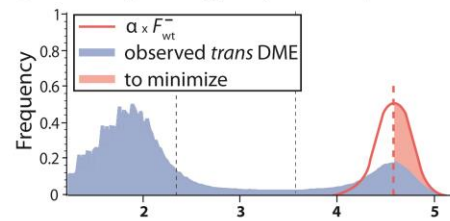

B) $f_{cis}^+ * F_{wt}^+$ matches the observed *cis* DME

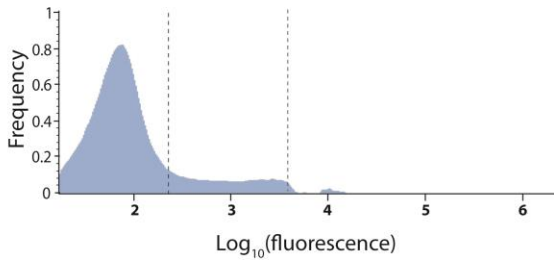

C) $f_{cis}^+ * \text{unmodified } F_{trans}^+$

D) removing the high expression peak in *trans* DME (F_{trans}^+)

E) modified *trans* DME without the high expression peak

F) naive prediction of the system DME
