

Figure 5 – Figure Supplement 3

(A) Enrichment of KEGG Pathway terms on 377 genes with reduced expression in ARID1A^{-/-} ARID1B KD cells that exhibit decreased accessibility and H3K27ac at regulatory regions bound by SWI/SNF and FRA1 following ARID1A/ARID1B loss.

(B) Enrichment of KEGG Pathway terms for genes downregulated by ARID1B KD in ARID1A^{-/-} HCT116 cells.
