

Figure 2 - Figure supplement 1

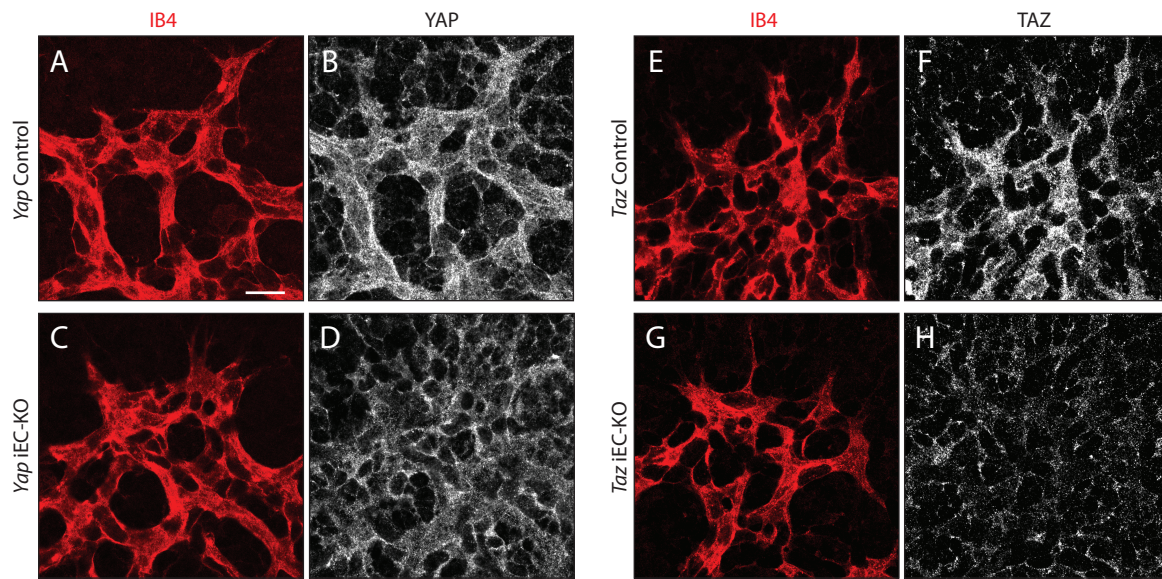

Figure 2 – Figure supplement 1. YAP and TAZ proteins are lost upon Cre-mediated genetic deletion in P6 mouse retinas.

Yap iEC-KO (*Yap*^{fl/fl} *Pdgfb-iCreERT2*+/*wt*), *Taz* iEC-KO (*Taz*^{fl/fl} *Pdgfb-iCreERT2*+/*wt*) and respective littermate control mice (*Yap*Control, *Yap*^{fl/fl} and *Taz*Control, *Taz*^{fl/fl}) were injected with tamoxifen at P1 and P3. At P6, mouse retinas were stained for YAP (grey, B,D), TAZ (grey, F,H), and with Isolectin B4 (IB4; red, A,C,E,G). *n* > 3 pups. Scale bar: 20μm.
