

Figure 4 - Figure supplement 1

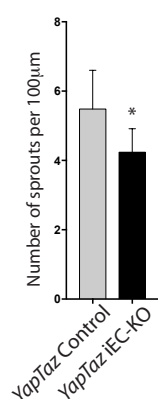

Figure 4 - Figure supplement 1. Combined loss of YAP and TAZ leads to decreased number of sprouts in the developing mouse retina.

Quantification of number of sprouts per 100 μm of sprouting front extension at P6 in *YapTaz* iEC-KO (n= 9 pups) and littermate control mice (n=9 pups). Data are mean \pm SD. p values were calculated using unpaired t-test. *, $p < 0.05$.
