

Figure 3-figure supplement 2. Expression of 14-3-3 proteins and PIF7 and quantification of signals of YFP in Figure 3b. (a) Anti-GFP antibody from Covance (MMS-118P-200G) was used to detect the nYFP-tagged protein. Anti-14-3-3 antibody from Agrisera (AS12 2119) was used to detect 14-3-3 λ-cYFP. The tobacco leaves were collected for western blotting 36 hr after infiltration. (b) Quantification of the YFP signals in Figure 3b.
