

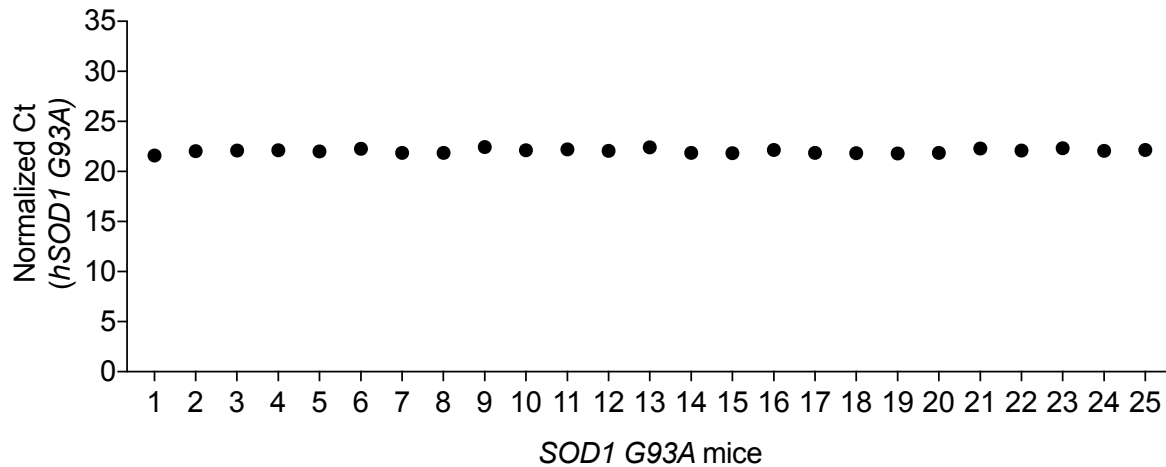

**Figure 3 - Figure Supplement 1**

**A**

***hSOD1 G93A* copy number remained unchanged over generations and throughout the experiments.** (A) The copy number of the human *SOD1 G93A* gene was quantified by real-time PCR and normalized to *GAPDH*. All mice included in this study had 21-26 copies of *hSOD1 G93A*. The normalized *hSOD1 G93A* Ct values are shown for 25 samples (filled circles).
