

Figure 3 Supplemental Figure 3

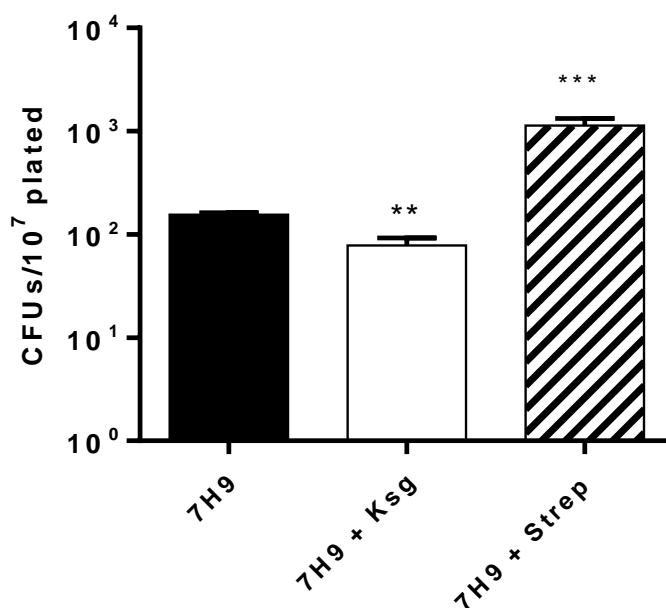

Fig. 3 Supplemental Fig. 3. Kasugamycin but not streptomycin pre-treatment increases rifampicin susceptibility in Msm. Msm cultures were pre-treated with ksg (50µg/ml) or streptomycin (0.2µg/ml) for 3 hours. Cells were then spun down, washed, resuspended and plated on rifampicin-agar or LB. Colonies were counted after 7 days.
