

Figure 2-figure supplement 2

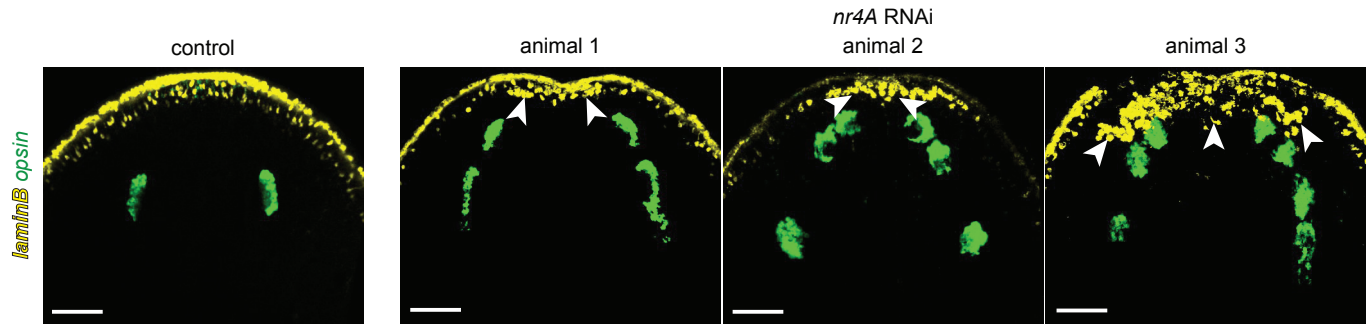

Figure 2-figure supplement 2. *nr4A* RNAi leads to the appearance of ectopic *laminB*⁺ cells posterior to the dorsal-ventral (DV) boundary of the head tip. *laminB* and *opsin* expression by FISH. *nr4A* was inhibited for 9 weeks in *nr4A(RNAi)* animals 1 and 2, and for 11 weeks in *nr4A(RNAi)* animal 3. Scale bars represent 100μm. Images are maximum intensity projections.
