

Figure 9-figure supplement 1

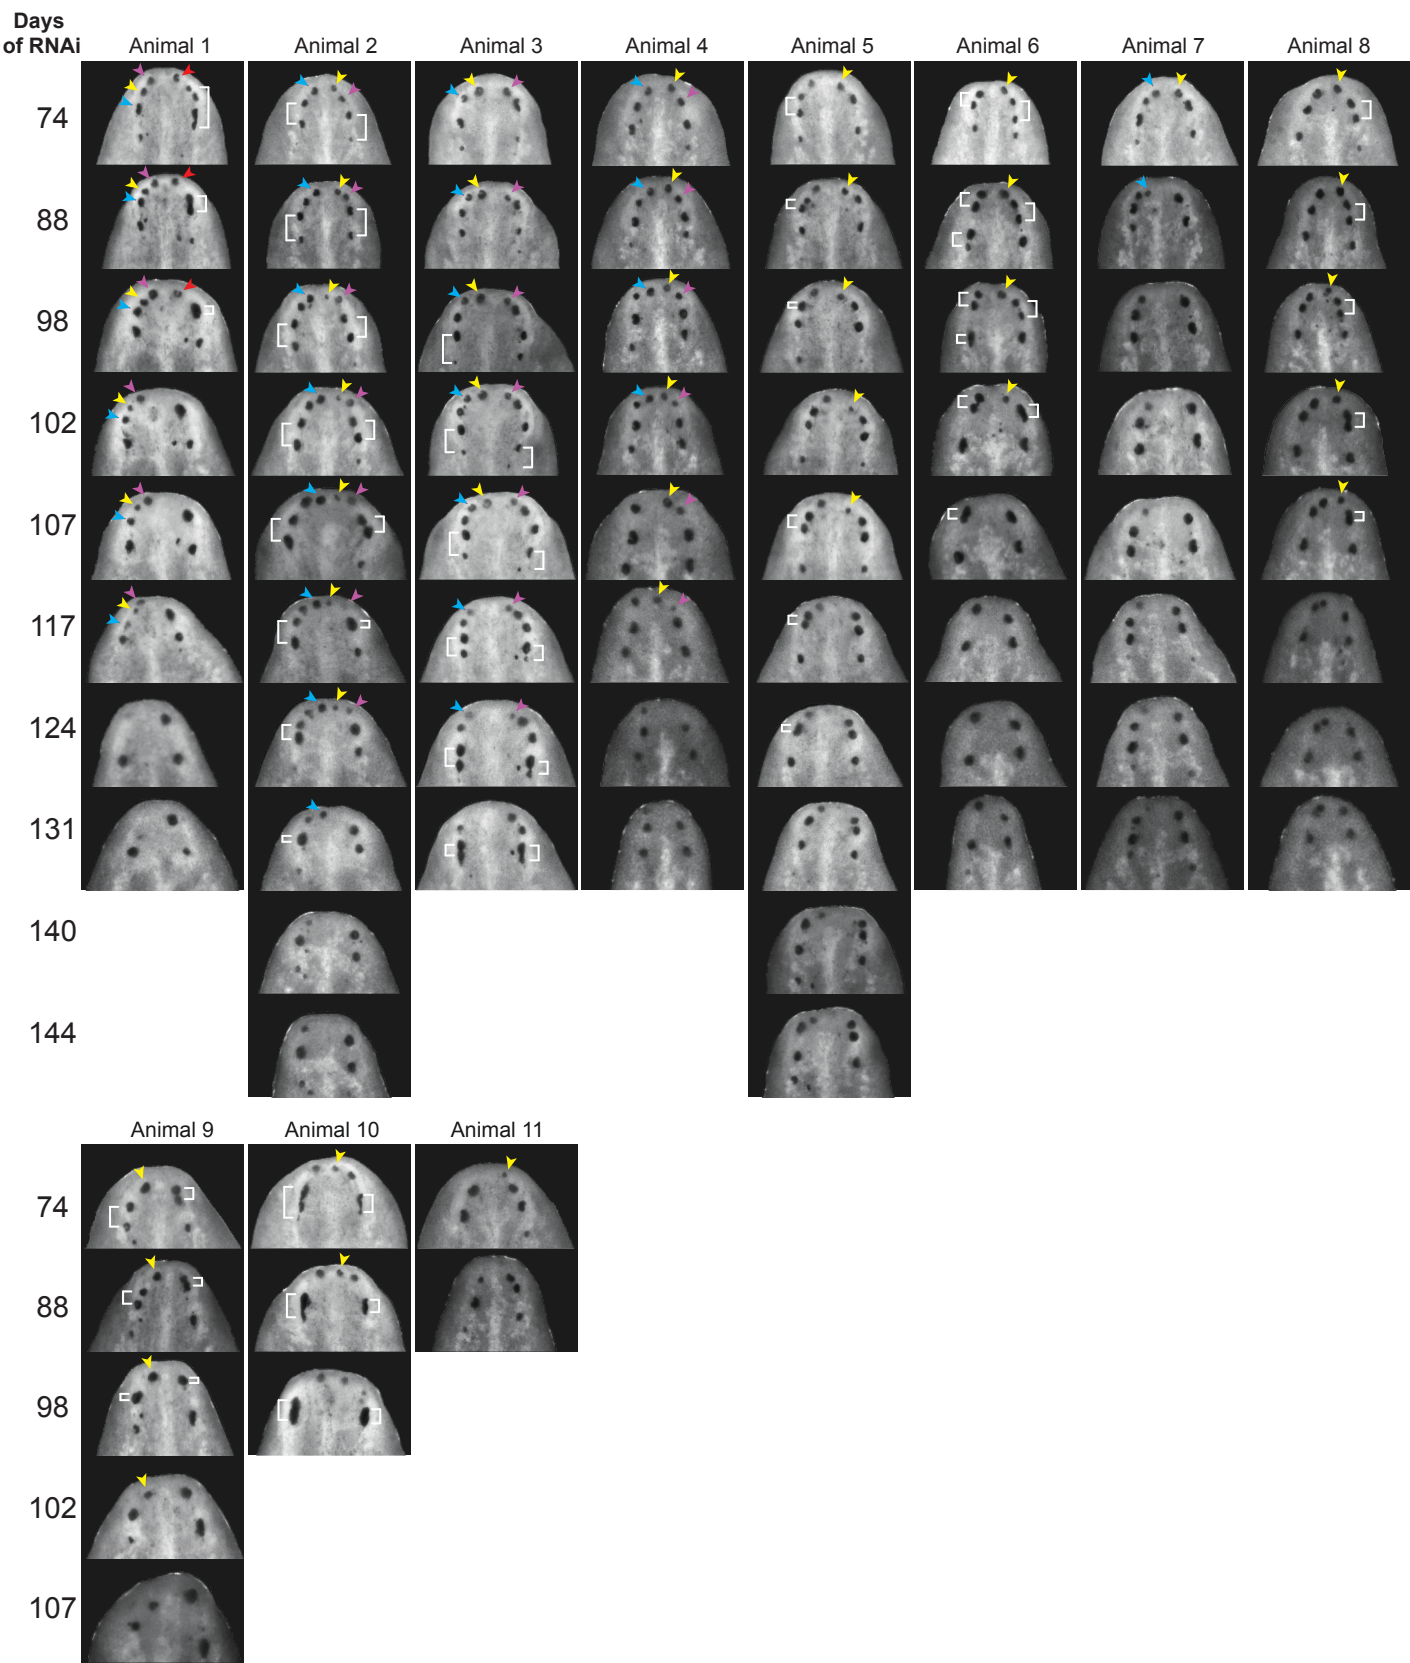

Figure 9-figure supplement 1. Anterior eyes disappear and fuse in long-term *nr4A* RNAi. Time course of long-term *nr4A* RNAi cataloging instances of eye disappearance and fusion. Single *nr4A*(RNAi) animals were separated and individually imaged over time. Eyes crowded near the head tip in *nr4A*(RNAi) animals were observed to disappear (colored arrow heads in frames in which they appear) or fuse (white brackets).
