

**Figure 5-figure supplement 1. Functional complementation of SLAH3 transgenic lines.** RT-PCR analysis of T1 transgenic *slah3-1/p35S::SLAH3-3xFLAG* lines and respective T1 lines expressing the S127A, S189A and S601A SLAH3 variants. RNA was extracted from six independent transgenic plants used in Figure 4 for stomatal aperture measurements.
