

Figure 5-figure supplement 1. Growth curves of *lpg1681* *Lp* strains upon exposure to HGA. For each experiment, we provide a matched wild type (KS79) control for comparison. The spontaneous *lpg1681* mutant and the deletion mutant both had less severe growth delays from HGA than wild type. Conversely, the *lpg1681* overexpression strain was sensitized to HGA, with longer growth delays than wild type. Dashed gray line shows the time for the 250 μM HGA condition to reach an OD of 0.1, to facilitate comparisons.
