

Figure 4-figure supplement 1. Depletion of RNA Polymerase I Factors Does Not Impact Interferon Signaling. (a,b) NHDFs were transfected with ns, TIF-1A, or UBF siRNA. After three days, cells were treated with recombinant IFN α for 6 hours, total RNA was isolated, and RT-qPCR was performed using primers specific for (a) IFIT2 mRNA and (b) ISG15 mRNA. (n=3)
