

Figure 1-figure supplement 2

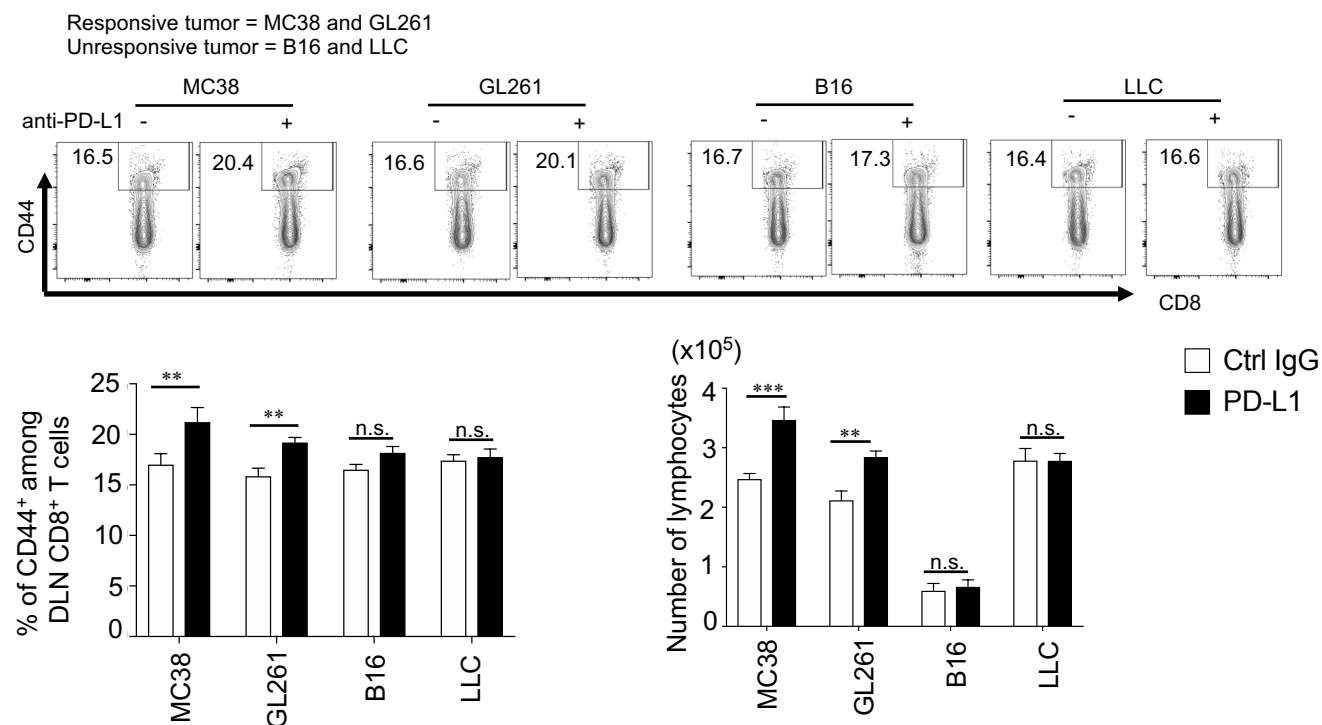

Figure 1-figure supplement 2. Increment of CD44⁺ CD8⁺ T cells in DLN after PD-1 blockade in the hosts with responsive tumor. Related with Figure 1C. CD8⁺ DLN cells were gated for CD44⁺. Representative FACS pattern for each group is shown in upper panel. CD44⁺ frequency (lower panel, left figure) and absolute number (lower panel, right figure) were quantified. Data represent the means \pm SEM of 5 mice. ** $p < 0.01$, *** $p < 0.001$, one-way ANOVA analysis. Data are representative of three independent experiments. n.s. represents 'not significant'.
