

Figure 3- figure supplement 2: High speed pressure clamp recordings in cells expressing *hsPIEZO1*

(A) Example traces of cell attached patch clamp recordings of PIEZO1 expressed in HEK-293T cells: positive and negative pressure stimuli were applied. (B) Maximal current amplitude of stretch-activated currents. Data are presented as mean \pm s.e.m. with individual data points overlayed. Open circles: negative pressure, closed circles: positive pressure.
