

A**B****C****Figure 2-figure supplement 3.**

(A) qRT-PCR analysis shows *FORCP* RNA overexpression upon stable transduction of 293T cells with WT- or Mutant-*FORCP*. pLVX is the empty vector. (B, C) Colony formation assays on plastic (B) and soft agar colony formation assays (C) were performed following overexpression of WT *FORCP* or Mutant *FORCP* in HCT116 cells. Error bars represent SD from 3 experiments. * $p < 0.05$, ** $p < 0.005$, ### $p < 0.001$.
