

Figure 9-figure supplement 1. *FOXM1* and *RHNO1* transcriptional start sites (TSS). RLM-RACE mapping data of the 5' ends of *FOXM1* and *RHNO1* mRNA. The arrows indicate the orientation of each gene 5' to 3'. The bars indicate the sequenced 5' ends of each transcript, with the names of the individual cell line samples (color coded) at left. NCBI RefSeq transcript assembly data is shown at bottom.
