

Figure 2 - Supplemental Figure 1. Alteration in the temporal pattern of spiking. A. Mean spike-field coherence (SFC) in the 3-6Hz band for units recorded in *Mecp2^{fl/y}* controls (n = 7) and *Dlx5/6* (n = 5), *VIP* (n = 5), *PV* (n = 5), and *SST* (n = 7) mutants. B. Mean SFC in the 40-55Hz band. *p < 0.05, **p < 0.01
