

Figure 6 – figure supplement 2. Clustering of mFISH excitatory neurons.

A. Points denoting individual excitatory neurons in mFISH data, colored according to respective coronal section. B. t-SNE visualization of mFISH data for the cells shown in (A). C. Spatial location of cells comprising two clusters. D. t-SNE visualization for two excitatory neuron clusters, colored according to cluster identity from (C). E,F. As in (C,D), but for six clusters.
