

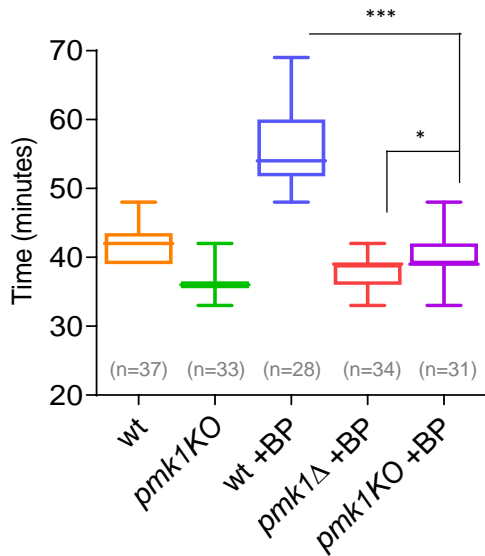

Figure 4-figure supplement 2

Timing of cytokinesis in *pmk1-KO* cells treated with BP (Figure 4-figure supplement 2)

Quantitation of the timing of cytokinesis in wild type, *pmk1Δ* and *pmk1-KO* cells expressing Imp2p-GFP/Sid4p-GFP. Cells were grown at 28°C and a time-lapse was carried out with or w/o BP (5μg/ml), added before imaging. Statistical significance was calculated by ANOVA followed by Šídák's multiple comparisons test (n.s. $p > 0.05$; * $p < 0.05$; *** $p < 0.0001$).
