

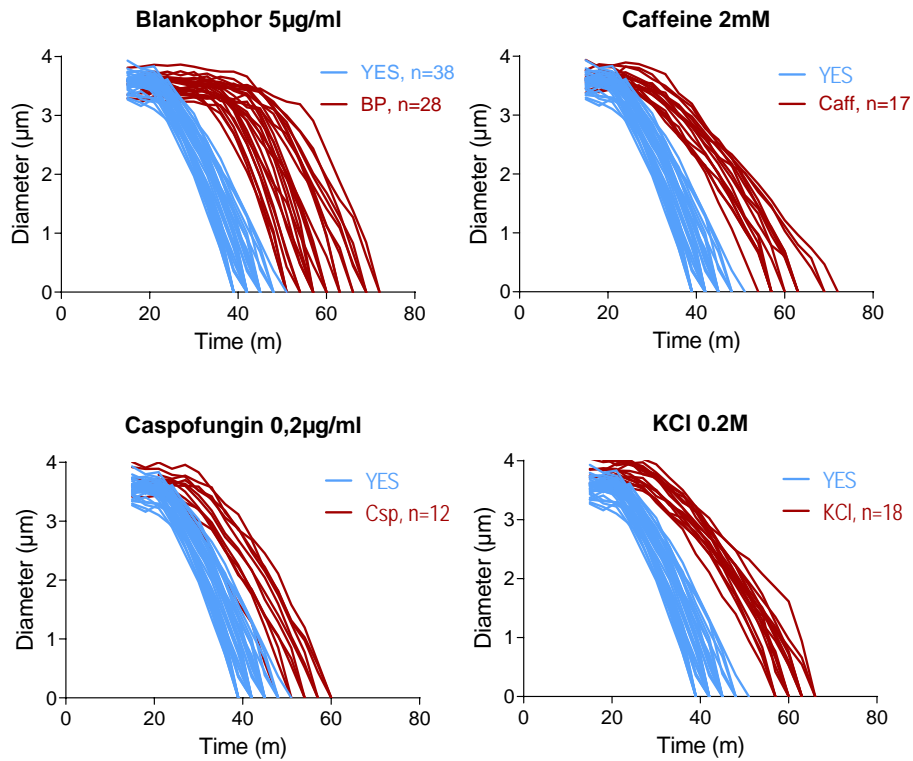

Figure 4-figure supplement 5

**Contractile ring constriction in wild type cells treated with BP, caffeine, caspofungin and KCl (Figure 4-figure supplement 5)**

Time course of the constriction of the contractile ring of wild-type cells expressing Imp2p-GFP/Sad1p-GFP, in the presence of the stress indicated (red) or without stress (blue), measured as the ring diameter. (t=0 was SPB separation).
