

A Stratification based on circ RNA expression

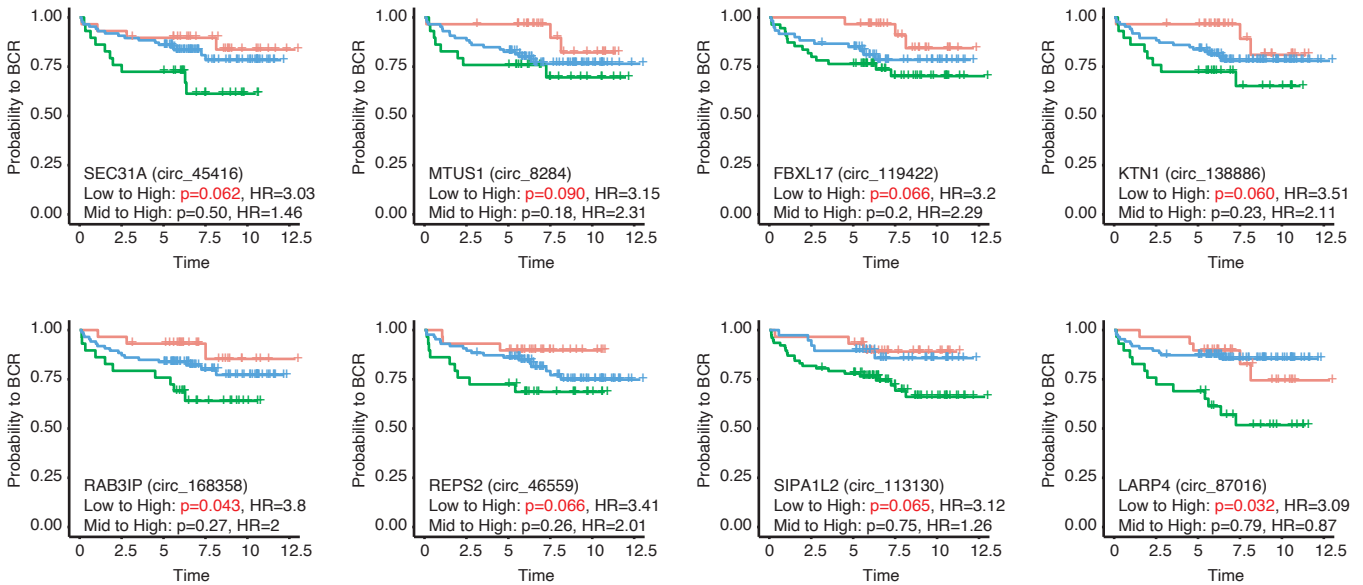

Tumor promoting
Low group : High group Hazard ratio < 1

Patients expressing indicated circRNA (Chen 2019 dataset)

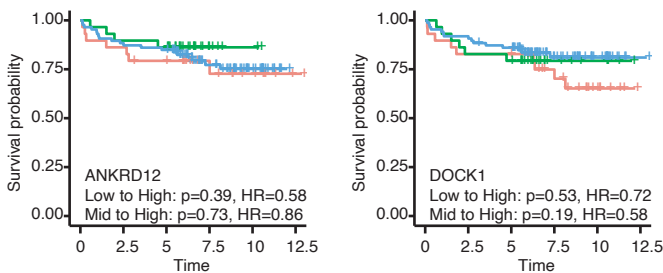

+high (> 80th percentile)
+low (< 20th percentile)
+Mid (20th to 80th percentile)

Tumor inhibitory
(Low group:High group Hazard ratio > 1)

B Stratification based on gene expression

Corresponding transcripts of Tumor promoting circRNAs

Patients expressing indicated transcript (Chen 2019 dataset)

+high (> 80th percentile)
+low (< 20th percentile)
+Mid (20th to 80th percentile)

Corresponding transcripts of Tumor inhibitory circRNAs
