

**Figure 1 - Supplement 2: Experimental kinetic raw data.** Raw ThT fluorescence data for the aggregation of the PSMs peptides under quiescent conditions at 37 °C. a) Aggregation of PSM $\alpha$ 1 (0.05-1.0 mg/mL). (b) Aggregation of PSM $\alpha$ 3 (0.2-1.0 mg/mL). (c) Aggregation of PSM $\beta$ 1 (20-50  $\mu$ g/mL). (d) Aggregation of PSM $\beta$ 2 (0.05-1.0 mg/mL).
